

Multimedia Projects Spring 2019 ELA 9 – Alternatives

In place of completing one of the assigned projects, you can base your project on any author or work in our textbook or in our library. You may use this as your IRP, but that is optional.

All the rules regarding length, content, and sources apply, and the same rubric will be used.

This is a good opportunity for you to delve deeper into the life and work of specific authors. Some options include:

- A review of a specific work
- A biography of the author
- An anthology of the author's works, with notes and comments of course

Whatever you choose, this has to be more than a simple report. As with the other projects, you need to identify issues, questions, or controversies about your subject and present your personal analysis or reaction to those questions or issues.
